FOR IMMEDIATE RELEASE

DELAWARE BASED LINNE INDUSTRIES ISSUED SOLAR POWERED WATER AERATION SYSTEM PATENT

**PATENT COVERS THE FIRST FULLY INTEGRATED SOLAR POWERED WATER
AERATION SYSTEM USED IN GOLF COURSE, HOMEOWNERS ASSOCIATION AND
AGRICULTURAL PONDS**

NEWARK, DE. – April 14, 2016 – LINNE Industries announced today that the US Patent Office has issued a patent to LINNE Industries for the first fully-integrated solar powered pond aeration system PondHawk®.

“PondHawk is a new solution that keeps ponds beautiful with none of the energy and maintenance costs of traditional fountains and aerators” said Sandra Burton, President and Co-Inventor, LINNE Industries.

“PondHawk delivers algae and mosquito eliminating bubbles to any pond anywhere without the expense of power delivery costs, electricity, and peak demand charges. PondHawk’s unique stealth and quiet design will not obstruct the beauty of the property and its battery-free technology operates in variable weather conditions with very low maintenance costs.”

“We designed the PondHawk to be installed without the need for energy knowledge.” said Craig Burton, COO and Co-Inventor, LINNE Industries. “PondHawk arrives pre-assembled and has a simple 3-step field installation leaving the PondHawk installed and running in less than three hours.”

About LINNE Industries and PondHawk

LINNE Industries is the manufacturer of the patented PondHawk® Solar Pond Aeration System. Founded in August 2013 and based in Newark, Delaware, LINNE Industries is an applied solar energy technology company that designs and manufactures sustainable energy products that improve the environment while providing best in class energy systems that deliver dynamic solutions for their customers. PondHawk is the first fully integrated solar pond aeration system that improves water quality, eliminates algae, and restores habitat without power delivery or electric costs.
